GSA Prequalified for SIN 899-8

MEC INVESTIGATION, REMEDIATION & UXO CLEARANCE STATEMENT OF QUALIFICATIONS

Chemical Warfare Materials (CWM) Dredging Operations

Eagle River Flats and Sediment Analysis, Fort Richardson, AK

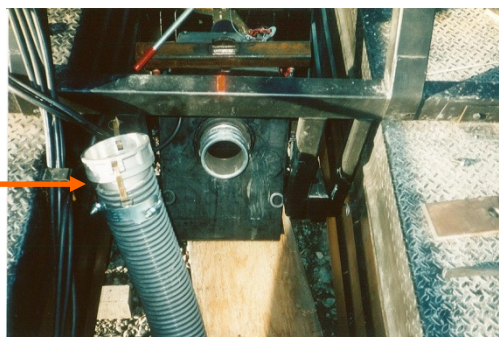

This project required specialized knowledge and experience in Federal and State wetlands regulations, wildlife issues, **Unexploded Ordnance (UXO) regulations**, **OSHA Safety and Health Requirements**, and **EPA Hazardous Waste regulations**.

ChemTrack designed a remote-controlled dredging system, developed **Remedial Action Plans**, a **Health & Safety Program**, and conducted extensive environmental investigations for hazards and for contaminant characterization.

ChemTrack is an Alaskan Owned Small Business that for 35 years, has provided construction, engineering and remedial technology for projects throughout Alaska.

Our munitions and explosives of concern (MEC) program is fully integrated with our environmental remediation capabilities and allows for turn-key operations on sites with mixed hazardous and munitions constituents (MC).

In a joint effort that included Federal Wildlife Agencies, **U.S. Army Department of Public Works**, **EPA**, **U.S. Army CRREL**, **State of Alaska Department of Natural Resources**, and **ADEC**, ChemTrack designed a remediation system for the removal of white phosphorus located within sediments.

INNOVATIVE TECHNOLOGY:

Debris separator for dredge pump. (PAT # 6003251)

Its purpose is for separation and disposal of small MECs i.e. hand grenades from 1000 gpm dredging material laden with white phosphorus.

Serving Our Clients Since 1973

Taku Gardens Environmental Investigation and Remediation Ft. Wainwright, AK

Recovered MECs from Taku Gardens jobsite at Ft. Wainwright, AK

History of Success

We have specialized knowledge and experience in MEC / UXO Investigation and Remediation.

Health and Safety is ChemTrack's Top Priority
Our EMR Rating Proves it.

2009	2008	2007	2006
.85	.87	.89	.89

Our staff routinely designs, implements, and manages site investigation programs involving project planning and development, subcontractor coordination, budget tracking, regulatory agency interaction, and technical report preparation.

ChemTrack clients include:

- Department of Public Works
- USACE
- Private Clients
- DNR

Investigation and Removal of Metal Debris, PCBs, Drums and Munitions and Explosives of Concern (MECs)

Unexploded Ordnances (UXOs)

MEC Screening process with UXO Technicians using Schonstedt Magnetometer

MEC Sifting process with UXO Technicians
